SUMMARY

As a passionate Flutter developer, I specialize in creating seamless and visually appealing cross-platform applications. With a focus on user-centric design and efficient coding practices, I bring a solid foundation in Flutter development. A quick learner and adaptable team player, I am committed to staying current with emerging trends in mobile development to deliver innovative and high-quality solutions.

EXPERIENCE

Flutter Developer

LevelX Learning LLP 06/2023 - Present Calicut, Kerala

- Designed and managed Flutter-powered mobile apps, guaranteeing superior performance and seamless user experience across various devices.
- Worked closely with multidisciplinary teams to integrate UI/UX designs, enriching the overall user journey and interaction.
- Skilled in Dart programming language, utilizing industry best practices in mobile development to optimize code efficiency.
- Performed comprehensive code inspections, pinpointing and remedying bugs to elevate application stability and reliability through meticulous review processes.

Junior Accountant

11thzense Pvt Ltd Kochi,Kerala 2022 - 2022 Kochi.Kerala

- Processed {1,000+} financial transactions and prepared financial statements, maintaining meticulous financial records.

PROJECTS

Chat App

03/2024 - Present Calicut
https://github.com/divyeshp07/Chat_app

Crafted a Dart chat app using Riverpod & Firebase for auth, Firestore for data, and Storage for media. Features messaging, auth, profile management, and media sharing

- Developed a real-time chat app in Dart, utilizing Riverpod for state management and Firebase for authentication, Firestore for data storage, and Storage for media.
- Implemented features such as real-time messaging, user authentication, profile management, and media sharing.
- Designed a responsive UI using Flutter, ensuring a seamless user experience across devices.
- Collaborated with a team, participated in code reviews, and resolved bugs to maintain high code quality.
- Adapted the app based on user feedback and emerging technologies to continuously enhance functionality.

TuneSync-(Music App)

12/2023 - 02/2024 calicut
https://github.com/divyeshp07/Tune_Sync

TuneSync is a Flutter-based music application designed to provide users with a seamless music listening experience. It combines an intuitive user interface with powerful features, allowing music enthusiasts to explore, discover, and enjoy their favorite tunes.

- Leveraged Riverpod for efficient state management, enhancing app responsiveness.
- Utilized ObjectBox for local data storage, allowing users to create playlists and save favorite songs.
- Ensured seamless music streaming for uninterrupted enjoyment.
- Integrated a robust search feature, allowing users to discover new music by artist, album, or genre.

PROJECTS

Netflix-Clone

📅 10/2023 📍 calicut

🔗 https://github.com/divyeshp07/netflix_clone

I crafted a Netflix clone app using Flutter, aiming to replicate the core features of the original Netflix application.

- Leveraging the **TMDB API**, the app dynamically fetches movie information, posters, and trailers.
- Developed an intuitive and visually appealing user interface, closely resembling the original Netflix app.
- Error Handling and Analytics Implemented graceful error handling for scenarios like network failures or invalid data.
